Professional Summary

Tech professional with 4+ years of professional experience across BFSI, operations, and business analytics, including 2+ years of hands-on experience in data analysis. Proficient in SQL, Power BI, Advanced Excel, Python, and Tableau for data extraction, reporting, dashboard development, and business analysis. Experienced in working with cross-functional teams to understand reporting requirements, ensure data accuracy, and support business decisions through meaningful insights. Familiar with AML/KYC compliance, fraud monitoring, and MIS reporting in the BFSI domain.

Skills

Technical Skills

- SQL
- Power BI
- Python
- Advanced Excel
- Tableau
- PostgreSQL

Core Competencies

- Data Analysis
- Dashboard Development
- Business Analysis
- Stakeholder Management
- AML/KYC Compliance

Professional Experience

Zynlogic Technologies pvt ltd

Jun 2025 - Present

Data Analyst

Hyderabad, India

- Extracted, validated, and analyzed data using SQL to support business reporting, operational analysis, and decision-making.
- Developed and maintained 8+ Power BI dashboards for business reporting and KPI monitoring, enabling stakeholders to track performance effectively.
- Prepared, cleaned, and analyzed large datasets using Advanced Excel (Power Query, Pivot Tables, VLOOKUP/XLOOKUP) to generate accurate MIS reports and improve reporting efficiency.
- Collaborated with business stakeholders to understand reporting requirements, validate data accuracy, and deliver timely reports that supported business operations.

ICICI Prudential

Jul 2024 - Jun 2025

Data Analyst

Hyderabad, India

- Acted as a **BFSI Business Analyst**, translating stakeholder requirements into Power BI and Excel dashboards for KPI, customer growth, and risk monitoring.
- Analyzed customer and transaction data using SQL and Advanced Excel to identify trends and segmentation opportunities, contributing to a **5% YoY customer base increase**.
- Performed **AML, KYC, and CDD compliance analytics** and transaction monitoring to identify fraud risk indicators and ensure audit-ready reporting.
- Collaborated with underwriting, risk, and operations teams to validate data quality, resolve discrepancies, and support compliant customer onboarding.

Eashan F&B

Feb 2023 - Apr 2024

Operations & Business Analytics Lead

Hyderabad, India

- Led **business and operations analytics**, supporting pricing, demand planning, procurement coordination, and execution oversight.
- Built MIS and performance dashboards in Excel to track sales, costs, margins, cash flows, and operational KPIs.
- Delivered data-driven insights on revenue, expenses, and process efficiency to support decision-making and profitability improvement.
- Partnered with stakeholders to ensure SLA adherence, process documentation, basic compliance controls, and continuous operational improvement.

HDFC Bank	Aug 2018 - Aug 2021
Data Analyst	Hyderabad, India
- Performed customer profiling, transaction analysis, and CASA growth analytics using Excel & internal dashboards. - Conducted AML, KYC, CDD compliance analytics to identify irregular transaction patterns and reduce fraud risk. - Built MIS reports and dashboards to track branch performance. - Supported data validation during onboarding and operations.	

Projects

Music Store SQL Analysis Tools: <i>SQL (PostgreSQL/SQLite)</i>
Problem: Understand customer behaviour, revenue patterns, and genre/artist performance for strategic decision-making.
Solution: Performed SQL-based analysis using joins, CTEs, subqueries, and aggregations to derive customer, revenue, and music preference insights from the Chinook database.
Outcome: Identified top customers, highest-revenue cities, popular genres/artists, and country-level trends, supporting targeted marketing, customer segmentation, and revenue optimization.
Business Impact: Translated transactional data into customer, revenue, and market insights to support data-driven decision-making, segmentation, and growth strategy.
Credit Card Fraud Detection Model Tools: <i>Python, Pandas, NumPy, Scikit-learn, XGBoost, SMOTE, Matplotlib, Seaborn</i>
Problem: Detect fraudulent credit card transactions in a highly imbalanced dataset of 6M+ records.
Solution: Built an end-to-end ML pipeline using SMOTE for class balancing and trained advanced models like XGBoost to identify hidden fraud patterns.
Outcome: Achieved ~99% ROC-AUC, enabling high-precision fraud detection and improved risk mitigation.
Business Impact: Demonstrates BFSI risk and compliance consulting through fraud analytics and transaction monitoring to support financial crime prevention and regulatory needs.
Loan Default Risk Analysis (EDA) Tools: <i>Python, Pandas, NumPy, Matplotlib, Seaborn</i>
Problem: Identify key financial and behavioural factors influencing loan default.
Solution: Conducted EDA using heatmaps, trend analysis, segmentation, and correlation studies to uncover default-driving patterns.
Outcome: Generated insights that strengthened credit assessment decisions and reduced risk exposure.
Business Impact: Identified key default drivers to support credit risk assessment, policy recommendations, and risk-based lending decisions.

Certifications & Accomplishments

Google Data Analytics Professional Certificate (Data Cleaning, SQL, R/Spreadsheets, Dashboards) Aug 2025. - Attended Technical Workshop on Data Science Remark Skill in Association with FCC, IIT Hyderabad Nov 2024. - Certificate of Accomplishment in SQL issued by HackerRank June 2025. - Certificate of Accomplishment in Python issued by HackerRank May 2025. - Completed a job simulation with Deloitte, developing skills in Data Analytics and Visualization Forage Mar 2025. - Certified Generative AI Foundation Program, issued by UpGrad in collaboration with Microsoft May 2025.
--

Education

International Institute of Information Technology Bangalore (IIIT-B)	May 2024 - Jun 2025
<i>Post graduation Program in Data Science GPA: 3.64 Out of 4</i> (Business Analytics, SQL, Financial Risk Modelling, Business Intelligence)	
Osmania University	Aug 2016 - Jun 2018
<i>Master of Business Administration (MBA- Finance)</i>
