Professional Summary

Data Analyst / BI Analyst with 6+ years of experience across Data Analytics, Business Intelligence, MIS Reporting and Management Reporting, with domain exposure across Banking, Insurance, Finance, and Technology. Strong hands-on experience in **SQL, Power BI, Advanced Excel, DAX and Power Query**, with expertise in KPI analysis, trend/variance analysis, data validation, reconciliation and dashboard development. Experienced in translating business requirements into analytical reports, automating recurring reporting and delivering data-driven insights to business stakeholders.

Skills

- **Business Intelligence & Visualization:** Power BI, Power BI Service, DAX, DAX Time Intelligence, Power Query (ETL), Data Modelling, Star Schema, Row-Level Security, Scheduled Refresh, Dashboard Development, Interactive Reports, KPI Dashboards, Data Visualization, Data Storytelling, Management Reporting
- **Data Analysis & Data Quality:** SQL, MySQL, PostgreSQL (Joins, CTEs, Subqueries, Aggregations), Data Extraction, Data Profiling, Data Cleansing, Data Validation, Data Reconciliation, Exploratory Data Analysis, Trend Analysis, Variance Analysis, Root Cause Analysis, Segmentation
- **Data Concepts:** Data Modelling Concepts, Data Warehousing Concepts, ETL Concepts, Relational Data Concepts
- **Programming:** Python, Pandas, NumPy; **Modern Technologies:** Generative AI, AI Productivity Tools
- **Excel:** Advanced Excel, Pivot Tables, Power Query, XLOOKUP/VLOOKUP, INDEX-MATCH, Reporting Automation
- **Statistical Analysis:** Outlier Analysis, Box Plots, Chi-Square Test, Normal Distribution, T-Distribution
- **Business & Finance:** Requirements Gathering, Stakeholder Management, Cross-functional Collaboration, Process Improvement, Ad-hoc Analysis, Data-Driven Decision Making, Financial Reporting, Financial Data Analysis, MIS Reporting, Oracle Hyperion Planning, Hyperion Financial Reporting (HFR)

Professional Experience

Data Analyst | Vision2Vision | Johannesburg, South Africa

Aug 2026 - Present

- Deliver daily, weekly and monthly MIS reports covering business, financial and operational performance for management.
- Track KPIs, revenue, targets and variances, highlighting gaps and trends for management action.
- Maintain Excel reports and management trackers used in periodic business reviews.
- Prepare and validate data from multiple sources to feed Power BI dashboards.
- Reconcile data and run variance analysis to keep management reports accurate and consistent.

Data Analyst | Zynlogic Technologies | Hyderabad, India

Jun 2025 - Jul 2026

- Developed and maintained Power BI dashboards and reports for management and business stakeholders.
- Defined KPIs and DAX measures with interactive visuals to monitor business performance.
- Cleaned and validated data from multiple sources to ensure accurate, consistent reporting.
- Analyzed trends, patterns and performance gaps to identify improvement opportunities.
- Presented findings and recommendations to stakeholders to support data-driven decisions.
- Used Excel for reconciliation, ad-hoc reporting and investigation of business metrics.
- Worked with cross-functional teams to gather requirements and deliver relevant analytical reports.
- Used Python (Pandas) to clean data, identifying missing, null and duplicate values before analysis and reporting.

BI Analyst | ICICI Prudential | Hyderabad, India

Jul 2024 - Jun 2025

- Developed interactive Power BI dashboards giving visibility into business and operational KPIs.
- Imported, transformed and modelled data from multiple sources; built relationships and DAX measures for KPIs and analytical views.
- Converted existing Excel/MIS reports into interactive Power BI dashboards, improving reporting efficiency and reducing manual effort.
- Reconciled data between source systems, Excel reports and Power BI dashboards.
- Maintained and enhanced reports as business requirements changed.

Reporting Analyst | Eashan F&B | Hyderabad, India

Feb 2023 - Jul 2024

- Analysed financial and operational data to deliver actionable insights to management and functional teams.
- Prepared recurring and ad-hoc finance and MIS reports covering business performance, KPIs, productivity and operational metrics.

- Supported finance reporting on Oracle Hyperion Planning by running scheduled daily, weekly and monthly data loads and validating the loaded data.
- Generated Hyperion Financial Reporting (HFR) reports and handled ad-hoc finance user requests.
- Built Excel-based dashboards and analytical reports tracking performance against business targets.
- Performed data cleaning, validation, reconciliation and root-cause analysis to improve reporting accuracy.
- Resolved data discrepancies and reporting issues with cross-functional teams, supporting management with insights for planning and performance monitoring.

Career break & Professional Upskilling

Sep 2021 - Feb 2023

Focused on professional upskilling in Data Analytics, SQL, Excel and Business Intelligence.

MIS Analyst | HDFC Bank | Hyderabad, India

Aug 2018 - Aug 2021

- Prepared and maintained daily, weekly, and monthly MIS reports for management and business teams.
- Consolidated data from multiple sources and performed data validation, reconciliation, and quality checks.
- Developed and maintained Excel-based reports, dashboards, trackers, and performance summaries.
- Automated recurring MIS reports using Advanced Excel, reducing manual effort and improving report turnaround time.
- Prepared presentation-ready summaries and insights for review by senior management.

Key Analytics Projects

Sales & Business Performance Analysis (SQL | Excel | Power BI)

- **Situation:** Sales data was spread across multiple sources, making it difficult for management to monitor performance, identify gaps and understand key business drivers.
- **Task:** Consolidate and analyse the sales data to give management a clear view of performance, gaps and drivers.
- **Action:** Extracted, cleansed and validated the data using SQL and Excel; performed KPI, trend, variance, segmentation and period-over-period analysis; built Power BI visualisations across regions, products and time periods.
- **Result:** Delivered a centralised view of sales performance that enabled faster identification of trends and gaps, supporting performance monitoring, resource allocation and business decisions.

Customer Analytics & Segmentation (SQL | Excel | Power BI)

- **Situation:** Customer and transaction data was available but lacked structured analysis of customer behaviour, segment performance and revenue contribution.
- **Task:** Analyse customer behaviour and segment performance to show which segments drive revenue.
- **Action:** Extracted and transformed customer and transaction data using SQL; performed exploratory data analysis, segmentation, trend analysis and revenue contribution analysis; built a structured analytical view of segments, purchasing behaviour and performance trends.
- **Result:** Enabled identification of high-value customer segments and behavioural patterns, supporting targeted customer strategies and data-driven decisions.

Operational Performance Analysis (SQL | Excel | Power BI)

- **Situation:** Operational teams relied on periodic reporting, limiting visibility into productivity trends, performance gaps and operational bottlenecks.
- **Task:** Give stakeholders clearer visibility into productivity, workload and target achievement, and help them trace the causes of performance deviations.
- **Action:** Analysed operational datasets using SQL and Excel (KPI, trend, variance and root-cause analysis); built Power BI visuals of productivity, workload, target achievement and performance trends as a centralised view of operational performance.
- **Result:** Helped stakeholders investigate deviations more efficiently and identify bottlenecks and improvement opportunities, supporting better resource allocation and process optimisation.

Certifications

- **Google Data Analytics Professional Certificate** (Data Cleaning, SQL, R, Dashboards) | Aug 2025.
- **SQL** certificate, HackerRank | Jun 2025; **Python** Certificate, HackerRank | May 2025.
- Completed a job simulation with **Deloitte**, on **Data Analytics and Visualization** | Forage | Mar 2025.
- **Generative AI** certified, UpGrad in collaboration with **Microsoft** | May 2025.

Education

Postgraduation Programme in **Data Science & Artificial Intelligence** | Grade: A
International Institute of Information Technology Bangalore (IIIT-B)

May 2024 - Jun 2025

Master of Business Administration – Finance

Aug 2016 - Jun 2018

Osmania University
