Professional Summary

Data Analyst / BI Analyst with 6+ years of experience across Data Analytics, Business Intelligence, MIS Reporting and Management Reporting, with domain exposure across Banking, Insurance, Technology and Business Operations. Strong hands-on experience in **SQL, Power BI, Advanced Excel, DAX and Power Query**, with expertise in KPI analysis, trend/variance analysis, data validation, reconciliation and dashboard development. Experienced in translating business requirements into analytical reports, automating recurring reporting and delivering data-driven insights to business stakeholders.

Skills

- **SQL & Analytics:** Data Analysis, SQL, Data Extraction, Data Transformation, Data Cleansing, Data Validation, Joins, Aggregations, CTEs, Subqueries, Exploratory Data Analysis, Trend Analysis, Variance Analysis, Root Cause Analysis, KPI Analysis, Segmentation, Python (Pandas, NumPy).
- **Power BI:** Power BI, DAX, Power Query, Data Modeling, Dashboard Development, Interactive Reports
- **Business Intelligence:** Business Intelligence, Data Visualization, KPI Dashboards, Data Storytelling, Management Reporting, Business Reporting, Data Warehouse
- **Excel:** Advanced Excel, Pivot Tables, Power Query, XLOOKUP/VLOOKUP, INDEX-MATCH, Reporting Automation
- **Business & Stakeholders:** Requirements Gathering, Business Requirements Analysis, Stakeholder Management, Cross-functional Collaboration, Process Improvement, Ad-hoc Analysis, Data-Driven Decision Making.

Professional Experience

Client: Vision 2 Vision Software Solutions

Aug 2026 – Present

Role: Data Analyst

- Support preparation of daily, weekly, and monthly MIS reports covering business, financial, and operational performance.
- Analyze financial and business data to track KPIs, revenue, targets, variances, and overall performance.
- Prepare and maintain Excel-based reports, dashboards, and management trackers to support periodic business reviews.
- Assist in developing and maintaining Power BI dashboards by preparing, validating, and organizing data from multiple sources.
- Perform data validation, reconciliation, and variance analysis to ensure accuracy and consistency of management reports.

Client: Zynlogic Technologies

Jun 2025 – Jul 2026

Role: Data Analyst

- Analyzed business data to identify trends, patterns, performance gaps, and opportunities for improvement.
- Developed and maintained Power BI dashboards and reports for management and business stakeholders.
- Prepared, cleaned, and validated data from multiple sources to ensure accuracy and consistency.
- Created KPIs, calculated measures, and interactive visualizations to support business performance monitoring.
- Used Excel for data analysis, reconciliation, ad-hoc reporting, and detailed investigation of business metrics.
- Collaborated with cross-functional teams to understand business requirements and deliver relevant analytical reports.
- Presented analytical findings and actionable insights to support data-driven business decisions.

Client: ICICI Prudential

Jul 2024 - Jun 2025

Role: BI Analyst

- Developed interactive dashboards and reports in Power BI to provide visibility into business and operational KPIs.
- Imported, transformed, and prepared data from multiple sources for reporting and analysis.
- Created data models and relationships in Power BI to support effective business reporting.
- Used basic to intermediate DAX calculations to create measures, KPIs, and analytical views.
- Converted existing Excel/MIS reports into interactive Power BI dashboards to improve reporting efficiency.
- Performed data validation and reconciliation between source data, Excel reports, and Power BI dashboards.
- Maintained and enhanced existing Power BI reports based on changing business requirements.

Client: Eashan F&B

Feb 2023 - Jul 2024

Role: Reporting Analyst

- Analyzed business and operational data to generate actionable insights for management and functional teams.
- Prepared recurring and ad-hoc reports covering business performance, productivity, KPIs, and operational metrics.
- Developed Excel-based dashboards and analytical reports to track performance against business targets.
- Performed data cleaning, validation, reconciliation, and root-cause analysis to improve reporting accuracy.

- Supported management with data-driven insights for operational planning and performance monitoring.
- Collaborated with cross-functional teams to resolve data discrepancies and reporting issues.

Client: HDFC Bank

Aug 2018 - Aug 2021

Role: MIS Analyst

- Prepared and maintained daily, weekly, and monthly MIS reports for management and business teams.
- Consolidated data from multiple sources and performed data validation, reconciliation, and quality checks.
- Developed and maintained Excel-based reports, dashboards, trackers, and performance summaries.
- Automated recurring MIS reports using Advanced Excel, reducing manual reporting effort and improving report turnaround time.
- Prepared presentation-ready summaries and insights for review by senior management.

Key Analytics Projects

1. Sales & Business Performance Analysis (SQL | Excel | Power BI | Data Analytics)

Problem: Sales data was distributed across multiple sources, making it difficult for management to monitor performance, identify gaps, and understand key business drivers.

Solution: Extracted, cleansed, validated, and analyzed sales data using SQL and Excel. Performed KPI, trend, variance, segmentation, and period-over-period analysis and developed analytical visualizations in Power BI.

Outcome: Created a centralized analytical view of sales performance across regions, products, and time periods, enabling faster identification of performance trends and gaps.

Business Impact: Provided data-driven insights to support sales performance monitoring, resource allocation, and business decision-making.

2. CUSTOMER ANALYTICS & SEGMENTATION (SQL | Excel | Data Analysis | Power BI)

Problem: Customer and transaction data was available but lacked structured analysis of customer behavior, segment performance, and revenue contribution.

Solution: Used SQL to extract and transform customer and transaction data and performed exploratory data analysis, segmentation, trend analysis, and revenue contribution analysis.

Outcome: Developed a structured analytical view of customer segments, purchasing behavior, revenue contribution, and performance trends.

Business Impact: Enabled identification of high-value customer segments and behavioral patterns, supporting targeted customer strategies and data-driven business decisions.

3. OPERATIONAL PERFORMANCE ANALYSIS (SQL | Excel | Power BI | Data Analytics)

Problem: Operational teams relied on periodic reporting, limiting visibility into productivity trends, performance gaps, and operational bottlenecks.

Solution: Analyzed operational datasets using SQL and Excel, performing KPI, trend, variance, and root-cause analysis. Used Power BI to visualize productivity, workload, target achievement, and performance trends.

Outcome: Established a centralized analytical view of operational performance and enabled stakeholders to investigate performance deviations more efficiently.

Business Impact: Supported identification of operational bottlenecks and improvement opportunities, enabling better resource allocation and data-driven process optimization.

Certifications & Accomplishments

- **Google Data Analytics Professional Certificate** (Data Cleaning, SQL, R, Dashboards) | Aug 2025.
- Attended **Technical Workshop on Data Science** | Remark Skill at **IIT Hyderabad** | Nov 2024.
- Certificate of Accomplishment in **SQL** issued by HackerRank | June 2025.
- Certificate of Accomplishment in **Python** issued by HackerRank | May 2025.
- Completed a job simulation with **Deloitte**, on **Data Analytics and Visualization** | Forage | Mar 2025.
- Certified **Generative AI** Foundation Program, issued by UpGrad in collaboration with **Microsoft** | May 2025.

Education

International Institute of Information Technology Bangalore (IIIT-B)

May 2024 - Jun 2025

*Post graduation Program in **Data Science** | GPA: 3.64 Out of 4*

(Data Analytics, SQL, Machine Learning, Business Intelligence)

Osmania University

Aug 2016 - Jun 2018

Master of Business Administration (MBA) in Finance
